

COMMUNICATIONS - RF/GPS/SATELLITE

As RF, GPS and satellite industries move toward commoditization, the need to maintain market recognition becomes more challenging. Rapid product introductions, shorter product life cycles, coupled with technology advancement at lower costs leave the OEMs with significant hurdles in maintaining a competitive advantage while preserving a positive bottom line.

Vexos understands this and has extensive experience with a diverse group of industries enabling our customers to maintain a competitive advantage. Our knowledgeable team of engineers and program managers will help you develop test strategies and functional test systems, as well as troubleshoot on the component level to bring your product to the market quickly.

SAMPLING OF PRODUCTS

- Passive/active asset tracking systems (RFID)
- Livestock tracking systems
- Mobile data terminals (GPS, L-band Rx/Tx, GPRS, GMS)
- Power monitoring systems (WiFi, ZigBee®, radio)
- Energy controls (ZigBee®, WiFi, radio)
- Geofencing/geotracking applications
- Sat navigation systems
- Telematics systems

The Power of a Strong Partner

- Full-service EMS provider specializing in high-mix, low- to mid-volume programs
- 25+ years of electronics manufacturing experience
- Exceptional quality assurance and certifications
- Unique global footprint to match your manufacturing requirements
- Flexibility to expand as your program grows
- Superior supply chain and logistics management

TEST STRATEGIES

- Basic functionality verification
- Stimulus/response testing (signal generator/network analyzer)
- Tx/Rx signal strength measurements
- Over the air network validation (including mobile and satellite link verification)

TECHNOLOGIES OFFERINGS

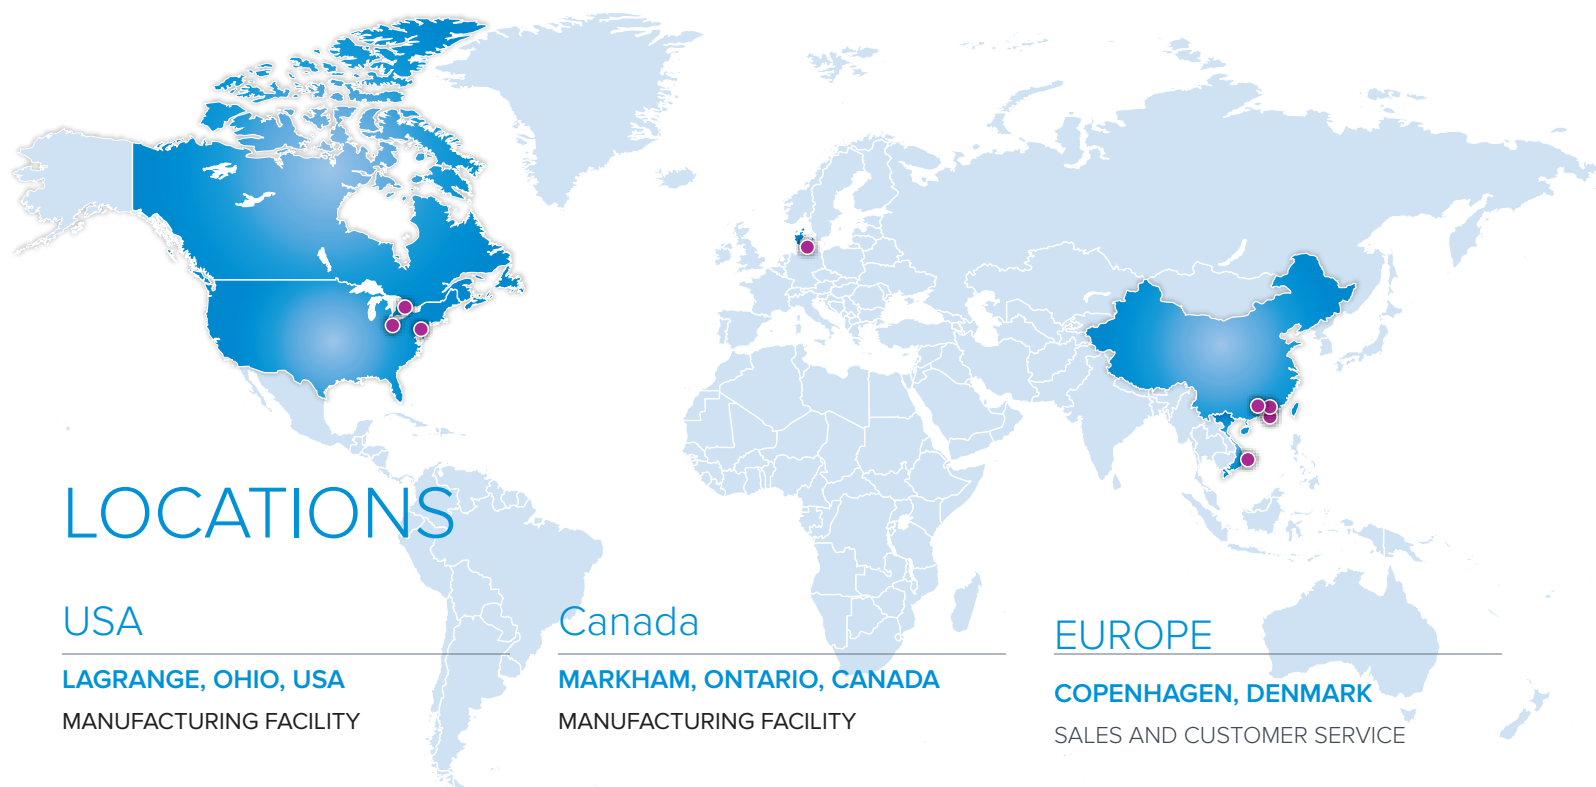

- RFID
- GPS
- L-band Rx/Tx
- GPRS
- GSM
- Bluetooth
- Wi-Fi, ZigBee®, radio
- Other proprietary protocols

FLEXIBLE, FULL-SERVICE PROVIDER OF ELECTRONIC MANUFACTURING AND MATERIAL SERVICES

With over 25 years of manufacturing experience, Vexos offers a wide range of EMS services including NPI, rapid prototyping, PCB assembly, test development, complete box-build, logistics and repair solutions; as well as material services such as PCBs, plastics, metals, and electro-mechanical components.

Vexos facilities are equipped with automated high speed, high volume, multiple surface mount assembly lines capable of producing the simplest, to the most complex design with various surface finishes and mixed material compositions. Located globally, customers have the ability to develop effective supply chain strategies and leverage benefits associated with cost control and volume demand.
